

Raycap Small Cell Poles, Enclosures & Toppers

We'll meet any project challenge with customer service & agility!

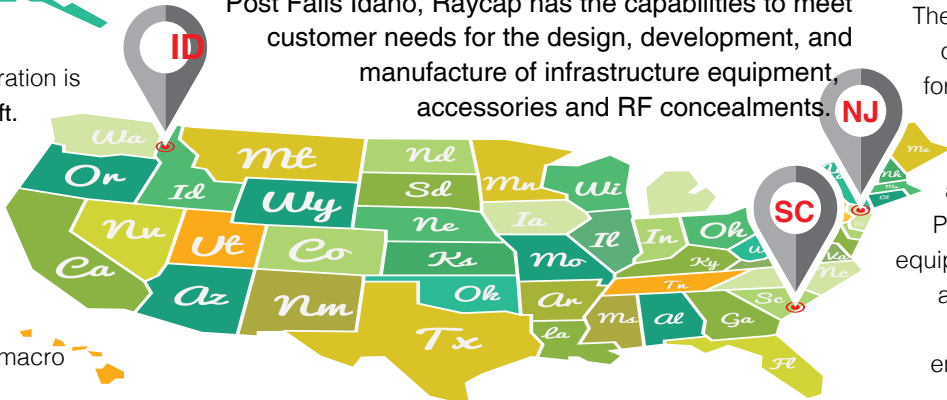

Raycap is a global leader in infrastructure for wireless and wireline networks, supplying the largest telecom operators and OEMs with equipment and components that protect, connect and conceal mission-critical equipment.

Post Falls, Idaho
Raycap's Idaho operation is a nearly 110,000 sq ft. facility that supports the design, development and manufacture of the electrical protection and connectivity solutions that go on macro and small cell sites.

With three state-of-the-art manufacturing facilities in North America: Charleston South Carolina, Kearny New Jersey and Post Falls Idaho, Raycap has the capabilities to meet customer needs for the design, development, and manufacture of infrastructure equipment, accessories and RF concealments.

Kearny, New Jersey
The 80,000 Sq ft. New Jersey operation is Raycap's hub for the design, manufacture and integration of wireless enclosures and electrical switchgear. Products include cabinets, equipment shrouds, radio and antenna mounts and other customized solutions that enhance Raycap's product offering for the telecom infrastructure market.

Charleston, South Carolina
This location houses two large facilities comprising nearly 225,000 sq ft. A full featured composite plant produces shaped concealment structures, and a steel manufacturing plant supports the creation, assembly, testing and integration of concealed poles for the rollout of 5G networks in the USA.

Materials tested and approved
for **3G • 4G • 5G • DAS • WiFi •**

Our capabilities include

- Research & Development
- Engineering: Electrical, RF, Mechanical, Structural, Environmental
- Steel Fabrication & forming
- Composite Material Manufacturing
- Assembly & Integration Services
- Custom painting & color matching
- Testing & pre-configuration
- Packing/Shipping/Logistics/on-time delivery
- Environmental, Thermal, RF & Fiber Optic Testing
- UL Certified Test Lab

• **Small Cell Sites • Macro Sites**

Our specialized equipment includes

- State-of-the-art laser cutters
- CNC Machines
- Metal bending, folding, cutting equipment
- Lathes
