

STEALTH Concealment Solutions

Panel and Rooftop Products

Featuring InvisiWave® C-band and 5G-Ready Panels

For the next generation of wireless deployments, small cell sites using 5G radios (C-band and mmWave) will be widely installed for network densification purposes. When placed in a community's right-of-way, a concealment solution may be necessary to hide radios in applications such as utility poles, street light poles, rooftop screenwalls, chimneys, etc. Concealments help with city approvals and can speed up the network deployment process.
